

Quality, Safety and Environmental Policy Statement

Established in 1972, Kador Engineering (Australia) Pty Ltd designs and manufactures pressure vessels and heavy equipment for the resource and transportation industries. Our activities include:

- Welding;
- Fabrication;
- Management of design processes including outsourcing of design engineering and drawing production;
- Surface preparation;
- Spare parts sales; and
- Refurbishment and maintenance.

We have a commitment to our Employees, Clients, Contractors and the Public to ensure their safety, to design and manufacture quality products and to minimise the impact of our operations on the environment. To ensure these three objectives are met we have established and implemented an integrated Quality, Safety and Environmental (QSE) management system which is certified the international quality and environmental management standards AS/NZS ISO 9001:2015 and ISO14001:2015, and to the ISO45001:2018 Standard for Occupational Health and Safety Management.

Kador Engineering has committed to:

- Comply with customer specifications and relevant statutory requirements;
- Establish, maintain and monitor objectives and targets for the integrated management system to ensure continuous improvement;
- Define roles and responsibilities within our integrated management system and provide training and assistance to ensure positive Quality, Safety and Environmental (QSE) outcomes are achieved;
- Provide and maintain safe workplaces and safe systems of work by ensuring hazards and associated risks are identified, risk controls are identified and implemented to ensure risks are reduced to as low as is reasonably practicable, and to ensure ongoing monitoring and review of the effectiveness of these controls;
- Ensure that purchased equipment and materials meet, and are maintained to, the required standards and do not compromise quality, safety or the environment;
- Ensure that providers of labour and contract services are appropriately qualified and competent;
- Minimise the environmental impact of our operations by minimizing our waste, discharges and emissions by using resources and energy more efficiently, and reusing and recycling resources as practical;
- Monitor, inspect, measure and report the effectiveness of our Integrated Management System, by analysing incidents, risk management, environment aspects and non-conformances.
- Consult with our employees, subcontractors, and clients to improve our procedures in all areas of our integrated management system
- Keep our stakeholders informed by communicating our policy and objectives to them so they are aware of our performance; and
- Provide adequate resources to meet the above requirements.

The full support of our employees, suppliers and subcontractors is sought in meeting our commitment.
